To Whom It May Concern:

Although I may have waited until the last day to write this letter, I have known exactly what I was going to say for weeks now. We got the Hague Water System installed and instantly we saw a huge difference. My husband and I had our house custom built for us 2 years ago. We put a lot of thought into everything, from drawing up the plans to picking out every light fixture. As excited as we were when everything was finished, there was definitely some things that we wished we would have done differently or things that we still needed. One of them was definitely a water softener. I was constantly frustrated with the dishwasher because I felt like it wasn't cleaning the dishes but really it was just hard water spots. After we got the Hague Water System installed our dishes are coming out of the dishwasher clean and clear and beautiful. My other big complaint to my husband was the ice our freezer was making. You could see all the particles floating in your glass from the ice when it melted. It was disgusting and I always made my husband buy ice if we ever had people over. This was one of the first things I mentioned during our first water test. Our ice is now clear and perfect!!

Obviously we would have been satisfied with just these changes but I am actually most grateful for the difference it has made in my daughter's skin. Our daughter is 14 months old and she had really bad eczema. Her doctor had me change her diet and take dairy out to make sure she wasn't allergic. I tried expensive lotions and body soap. I changed laundry detergents. I did everything I could think of and nothing helped. I was shocked to see that other people had written in their letters that the water system helped their skin problems. I was so excited to see that and it really made a difference in our decision making process. And I am glad we did make the right decision. Within a few days, my daughter's eczema was starting to clear up and it was completely gone within a week! It has been over a month and her skin has remained clear. We highly recommend this system. We were impressed with how quickly we saw a difference and we are so happy with the Hague Water System. Our system was installed the day after we had our first water test and both the salesman and installer were so nice and professional. We have recommended this system to our friends and we hope this letter help you make your decision too.

Sincerely,

Kristen Wallin
